CMEx OÜ

GREETINGS FROM PROXYMM SCIENCE!

We are a healthcare consulting services provider, co-creating solutions for our clients in the healthcare and pharma sectors.

We have co-organized over 180 customized Medical Education programs tailored to our clients' learning needs and objectives in the industry globally.

Bridging learning gaps, sharing best practices and standards, and implementing coordinated engagement among allied professionals have never been as crucial as ever before.

CMEx is a platform dedicated to promoting Medical Education programs offered by training hospitals and the expertise of individual Thought Leaders and Subject-Matter-Experts. It aims to systematically facilitate the transfer and exchange of knowledge and skills among medical and non-medical professionals, students and stakeholders, institutions, and industries, worldwide.

Real-world practise; real-world education, across geographies.

We want to invite you to collaborate with us as part of the selected institutions in healthcare.

Please see the following pages for the details.

ABOUT CMEx

For over five years, our principal company, Proxymm Science, has been co-facilitating customized continuing medical education and professional development programs with teaching and research hospitals, specialty medical institutions, and Thought Leaders in different therapeutic specialties. We witnessed the unmet learning needs and gaps in different fields in health sciences across geographies.

We believe that collaboration, by sharing knowledge, skills, best practices, developments and even challenges, across the world is the future of learning in health care.

When everybody shares, everybody gains.

Yours,

Mariae Arendayen
Director & Chief Vision Officer
